Go ahead and put that up, we can change it if he responds to Althea's email with changes.

Thanks,
Ben

This is a draft sketch and we're waiting on confirmation from the State Chemist that this accurately reflects his recollection of the site.

Thank You,
Ben

All of the layers in the viewer.
OSCs do not have google earth on our PCs so those files cannot be delivered to us. And kmz are stripped from emails by our firewall

We are working on putting it on a pdf map this am. Attached is the kmz that was in that email.

Can you let us know which of these layers if any you would like to see on the viewer.

Should we send the final pdf to this group?

I did not receive this sketch.
I was told this was sent to Janine, if it was, can I get a copy

Thanks

Eric,
Ben will send you the information we got from Texas State Chemist Russell Scott about what was where prior to explosion as he recalls it. It will be pretty rough. Will try to find out ATF exclusion zones.

On the call you mentioned that ATF is controlling access to a certain zone in the explosion area. You mentioned that if mgmt was thinking about sampling there would be certain areas where we would be prohibited from sampling because ATF is controlling access.

What we would like to know is what areas are considered off limits due to the law enforcement activities that are taking place. Alex or Ben can use a tool in this viewer to draw the area where access would be prohibited until law enforcement releases the scene. Rauscher and I have discussed a prioritized approach to sampling based off the blast zone and stepping further away from the explosion site to test for the chemicals of concern. The green dots you see on the map are where the mobile air monitoring teams have conducted their runs. As you can see, the mobile teams have been able to get very close to the facility but not all the way in (which makes sense). Is the park directly to the west of the facility off limits?

If you haven't been on the [Response Viewer](#) you need to log on and check it out. The user name is west and the password is *Kolache!*

I have a call in to the Texas State Chemist asking him to stop by and help us with a facility sketch.

You also mentioned a sketch of the exclusion area around the site. Could you give me a little more information about what you need?
